**RE: Industrial Storm Water Permit Requirements; Sector M of the Multi Sector Permit:
Vehicle Salvage Operation; TNR058064, Cumberland County, Tennessee
Permit Expiration: May 14th, 2014**

Dear Mr. Bilbrey:

On May 24th, 2011, The Division of Water Pollution Control, (WPC) Cookeville Environmental Field Office (EFO) conducted a site inspection concerning industrial storm water monitoring at your vehicle salvage business location, 110 Sparta Drive, Crossville, Tennessee, in Cumberland County. The Purpose of this investigation was to determine compliance with *The Tennessee Water Quality Control Act of 1977*.

During the site visit, we discussed your Industrial Storm Water (ISW) permit (TNR058064) associated with salvage yard operations (Sector M). It was noted that the site was well organized. The housekeeping was very good. Sample results for the 2010 calendar year were reviewed along with other site records. The 2010 analytical results were in good order. The contract laboratory was contacted during the inspection in order to set up the 2011 inspection.

It is required that you send your annual sampling results to the Nashville Central Office of Water Pollution Control. The Cookeville office also requires that you send copies of the lab results to the Cookeville EFO address. The Cookeville EFO will review them and place them in your Industrial Storm Water Permit file.

Mr. Buddy Bilbrey

The effluent discharge area.

Drainage above the effluent discharge. Note the iron staining on the limestone gravel.
